Apex Systems: Proposal

Secure, scalable order management for Kestrel Retail
RFP KRL-2026-07 · Cloud Order Management Platform with ERP Integration · Kestrel Retail Ltd

1. Executive Summary

Apex Systems proposes a cloud-native order management platform (OMP) for Kestrel Retail Ltd that unifies web, store and marketplace orders and integrates in real time with Kestrel's SAP S/4HANA ERP. Our design prioritises resilience, security and scale for Kestrel's projected growth from 18,000 to 60,000 orders per day.

We understand the core requirement as: a single order view across channels, automated inventory reservation, bi-directional ERP synchronisation, and audit-ready controls aligned to the Digital Personal Data Protection (DPDP) Act 2023.

2. Proposed Solution and Architecture

- Microservices on Kubernetes (AWS EKS, Mumbai region ap-south-1) with multi-AZ high availability and a 99.95% uptime design target.
- Event-driven integration using Apache Kafka; SAP S/4HANA integration through certified OData APIs and IDoc adapters, with an idempotent retry queue.
- Pre-built connectors for Shopify, Amazon Seller Central and Kestrel's POS (REST API); 140+ documented API endpoints with OpenAPI 3.0 specs.
- Auto-scaling tested to 120,000 orders/day at p95 latency under 300 ms (load test report available as Annex C).
- Disaster recovery: cross-region replica in Hyderabad; RPO 15 minutes, RTO 2 hours, tested twice yearly.

3. Implementation Approach and Timeline

Delivery follows a phased approach over 24 weeks:

Phase	Weeks	Key milestones
Discovery & design	1–5	Solution blueprint, integration specs signed off
Build & integrate	6–15	Core OMP, SAP integration, channel connectors
Testing	16–20	SIT, performance test, security test, UAT
Go-live & hypercare	21–24	Phased cutover by region; 4-week hypercare

Team: 1 delivery lead, 1 solution architect, 6 engineers, 2 QA, 1 security engineer (11 FTE at peak). Key risks (SAP data quality, channel API limits) are tracked in a weekly risk register reviewed by a joint steering committee.

4. Commercial Proposal

Item	Basis	Amount (INR)
Implementation (fixed price)	One-time	1,35,00,000
Platform subscription	Per year × 3 years @ 42,00,000	1,26,00,000
Premium support & DR	Per year × 3 years @ 8,00,000	24,00,000
Total 3-year cost of ownership		**2,85,00,000**

Assumptions: prices exclude GST; Kestrel provides SAP basis access; up to 3 channel connectors included; payment 30% on design sign-off, 40% on UAT, 30% on go-live. Quote valid for 90 days.

5. Security, Compliance and Risk Controls

- Certifications: ISO/IEC 27001:2022 (certified since 2019) and SOC 2 Type II (latest report dated March 2026).
- Encryption with AES-256 at rest and TLS 1.3 in transit; customer-managed keys via AWS KMS.

- SSO with MFA, role-based access control (RBAC), immutable audit logs retained for 7 years, streamed to Kestrel's SIEM.
- Independent penetration test before go-live and annually; critical vulnerabilities patched within 72 hours.
- DPDP Act 2023 compliance: data residency in India, consent logging, data-principal request workflow.

6. Support Model, Experience and References

Support: 24x7 helpdesk; P1 response time 30 minutes, P2 2 hours; named customer success manager; quarterly service reviews.

Experience: 9 years in retail commerce platforms; 14 OMP implementations, including two SAP-integrated rollouts above 50,000 orders/day.
